Experience

QA Specialist – Servigistics R&D Team | PTC Inc. **05/24 – Present**
PTC Inc. is a global software leader in PLM, CAD, IIoT , SLM, AR and ALM, used by over **35,000** businesses worldwide, including 95% of **Fortune 500** discrete manufacturers.

- Automate UI testing using **Selenium** with **JUnit** and execute **Sanity, Regression, Functional,** and **Smoke** tests and **API Testing** using **Rest Assured** and **Postman**.
- Manage **DevOps tasks** by provisioning instances with **Kubernetes** or manually deploying and configuring them with **SQL, Oracle,** or **Snowflake** on **Windows** or **Linux**.
- Maintain a dashboard with instance details and developed an **auto-upgrade job** in **Jenkins**, enabling instance upgrades directly from dashboard for maintenance.
- Integrate automated test cases into the **CI/CD pipeline** using **Jenkins**.
- Drive Shift-Left-Testing by working with developers early to catch and resolve issues.
- Diagnose and escalate complex software issues, providing clear insights to dev teams.
- Contribute to product discussions, enhancing performance and customer experience.
- Recognized for maintaining stable test environments improving overall product quality.

Sr. Software Test Engineer | Mind Fire Digital **07/22 – 05/24**

- Utilized **Cypress** for automation testing of FDA-cleared arterial analysis software.
- Used **Git** for version control, integrated **CI/CD pipelines** for faster testing, and tapped into **AWS** for scalable automation infrastructure.
- Deployed **Selenium** for e-commerce website automation, achieving **20%** increase in test coverage efficiency, reliability and improved accuracy.
- Implemented Page Object Model (**POM**) for maintainable automation scripts and executed data-driven testing strategies, ensuring comprehensive test coverage.
- Ensured seamless integration of **100+** new features into the website, focusing on **end-to-end testing** and **API** functionality improving user satisfaction by **25%**.
- Conducted **20+ smoke** tests per build, reducing issue resolution time by **10%**.
- Managed **regression** testing across the application resolving about **15%** more issues.
- Conducted comprehensive testing across **3** environments QA, UAT, and Production.
- Recognized for **Agile** collaboration, meeting deadlines with **5** cross-functional teams.
- Leveraged **Jira** as project management and **Xray** as test management tool.

Programmer Analyst | Cognizant Technology Solutions **12/21 - 07/22**

- Maintained test cases and executed precise testing procedures.
- Generate detailed test reports and documented bugs for clarity.
- Collaborated effectively with cross-functional teams for clear communication.

Projects

World Clock

- Developed an **Automated World Clock** using **Selenium WebDriver** and **Java** to validate time across **10+ locations**, Improved testing efficiency and accuracy by **20%** through **POM** implementation, reducing validation time by **15%**.
- Enhanced system responsiveness by automating slider control for hour comparisons.

Zig wheels

- Automated [Zig wheels](#) for displaying upcoming bikes with price-based filtering and showcasing launch dates and pricing details. Developed functionality to display popular second-hand cars in specific cities.
- Built a maintainable automation framework using **TestNG, Selenium WebDriver, Extent Report,** and **POM** with Java, incorporating synchronization, data-driven testing, and exception handling.

Positions of Responsibility & Extracurriculars

- Expanded the impact of **Light De Literacy**, a dedicated **NGO** for underprivileged children's education, by establishing multiple outreach camps, facilitating the enrolment of over **200** children.
- Demonstrated leadership as the **Skipper**, securing victories in **3** Intercollege Cricket Tournaments involving more than 10 teams.
- Contributed actively to national and regional technical fairs, including **IETF’19**, engaging with over **300** teams.

Education

B. Tech | 2021

- CGPA/Percentage: 7.23

Intermediate | 2016

- CGPA/Percentage: 82%

Tools & Technologies

Automation Tools & frameworks
Cypress/JS, Selenium/JAVA, TestNG

Build & Dependency Management
Maven, Node Package Manager

Project & Test Management Tool
JIRA, X-Ray, Zephyr,
Cypress Dashboard, Extent Reports,

Database Management & Tool
SQL, MongoDB, DBeaver, Oracle,
Snowflake

Dashboard & Reporting
Cypress Dashboard, Extent Reports

Version Control
Git, GitHub

Programming Languages
JAVA, JavaScript, HTML, CSS

API Documentation & Testing
Swagger, Postman, REST, SOAP,
Rest Assured

Others
AWS, CI/CD Pipelines, Jenkins,
Kubernetes
